WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

NATIONAL PHOTOGRAPHIC INTERPRETATION CENTER

TOP SECRET

PREFACE

This report is one in a series on Soviet Ground Force and logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

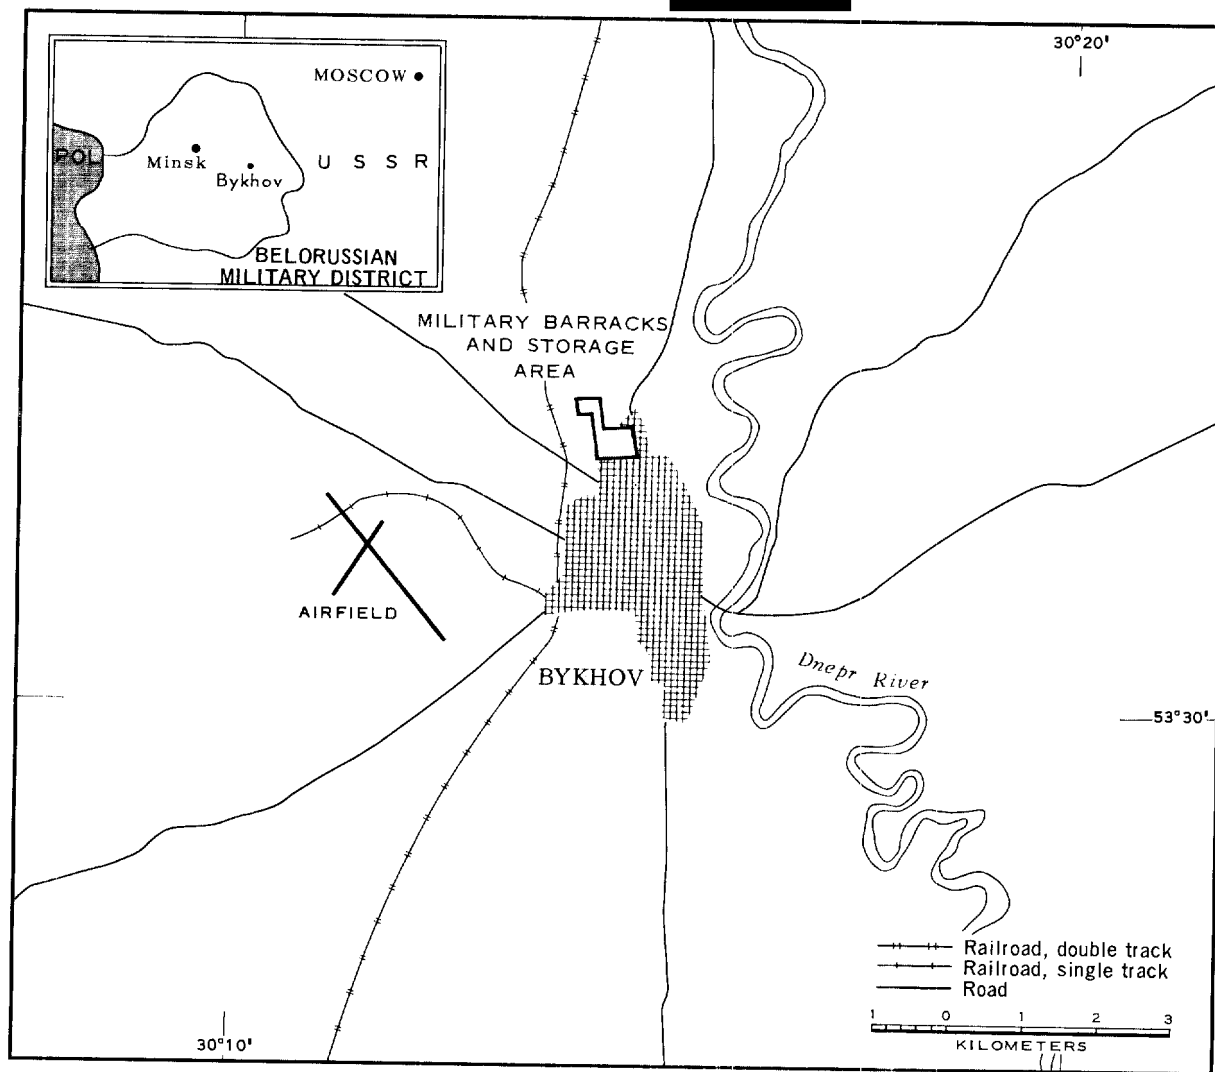

FIGURE 1. LOCATION OF MILITARY BARRACKS AND STORAGE AREA, BYKHOV, USSR.

SUMMARY 25X1D 25X1D

A military barracks and storage area is located in the northern part of Bykhov (53-30N 030-15E), approximately 2 kilometers (km) northeast of the Bykhov Airfield (Figure 1). The installation is served by the streets of Bykhov. Although not rail served, a rail siding in Bykhov is readily accessible by road.

The installation is divided into three separately secured areas connected by a good all-weather road (Figures 2 and 3). It covers 76 acres and contains 89 buildings: five administration, 16 barracks, 40 storage, 26 support, and two maintenance/storage. A motor pool, an open storage area, one possible small arms firing range, and one athletic field are also located at this installation.

The area is covered by [REDACTED] TALENT pho-

tography and by eight KEYHOLE missions between [REDACTED]

The barracks area was reported in Army DPIR-24-58 (based on [REDACTED] TALENT coverage) as an anti-aircraft artillery training area. A comparative study of the later missions indicate the AAA training facilities no longer exist in this area. It appears the barracks area is now used in conjunction with the storage area.

Significant changes between [REDACTED] [REDACTED] in the barracks area include the addition of five barracks, three administration, and six support buildings. In the storage area, 12 additional storage buildings were constructed between [REDACTED] [REDACTED] Between [REDACTED] 11 storage buildings and two support buildings were added.

DESCRIPTION OF INSTALLATION

25X1D

25X1D

Railroad Service

A rail siding in Bykhov is readily accessible by road.

Road Service

The installation is served by the streets of Bykhov.

Administrative and Troop Housing Area

Area D contains five administration buildings, 16 barracks, eight support buildings, and one storage building. Five barracks, one administration, and three support buildings were first observed on [REDACTED] coverage. Two administration and three support buildings were first observed on [REDACTED] coverage.

General Storage Areas

Area E1 contains 10 storage and 10 support buildings. TALENT coverage revealed eight storage and seven support buildings in the area. [REDACTED] four of each type had been removed (probably those directly connected with the artillery training facilities). Between [REDACTED] an additional six storage and seven support buildings were constructed.

Area E2 contains one storage building and four support buildings. This is a secured open storage area covering approximately 3.4 acres. It was observed on both TALENT and KEYHOLE photography. One support building was added between [REDACTED] One storage and two support buildings were added between [REDACTED]

25X1D

Area E3, probably secured, contains 28 storage buildings and four support buildings. TALENT photography showed only three storage and four support buildings in this area. [REDACTED] the number had increased to 15 storage buildings, and between [REDACTED] an additional 13 storage buildings had been completed.

Equipment Storage/Maintenance Area

Area J is fenced, measures 545 by 240 feet, and contains two maintenance/storage buildings, one 115 by 35 feet and one 80 by 35 feet. The motor pool area covers approximately three acres. On [REDACTED] coverage only one maintenance/

storage building was evident. One maintenance building was added between [REDACTED]

Athletic Field

Area K, an athletic field, appeared to be in use on all missions studied.

25X1D

Small Arms Firing Ranges

Two small arms firing ranges were observed on [REDACTED] TALENT coverage. On the later coverage, neither of the ranges could be definitely identified; however, one possible range (Area L) was noted along the north edge of Area E1.
